

# Septic Product Specialist

**Tailor made Tanks to suit your site-specific requirements**

- We have the unique ability to be flexible with the sizing of our tanks and can tailor-make them to site-specific requirements.
- Structurally engineered and tested to meet Australian and New Zealand standards and stringent accreditation by Global Certification Pty Ltd.
- We Manufacture Septic Tanks, Stormwater Detention Tanks and Collection Wells ranging from 3,500L to 60,000L in capacity.
- Possessing superior strength to other products on the market, our Tanks are made from thick heavy duty fibreglass which is both lightweight and non-corrosive.
- Saddles are factory sealed to every tank and come with OH&S compliant lockable inspection lids for easy access.
- Suits domestic, commercial and industrial purposes.
- All tanks come with a 15-year warranty, as required by the Australia and New Zealand Standard.
- Our heavy duty, lightweight fibreglass tanks are easy to install.

\*For tanks 5,800L to 60,000L please contact us for more information and pricing.

## Australia's FIRST AND ONLY Nationally Approved Lightweight Septic Tank Access Saddle.

We have developed, in conjunction with Sydney company BioSeptic Sewage Systems, an unparalleled septic product. After extensive research and development - including 18 months of design and rigorous testing, the Access Saddle was brought to market in February 2017.

### SEPTIC RISERS

The septic tank Access Saddle provides easy access to the septic tank. It fits over existing buried septic tanks and raises the access cover to ground level, so that the tank is fully accessible. Once the new saddle is installed, there is no more inconvenient digging required to access the tank for maintenance. The septic tank Access Saddle makes the tank easy to find, open and access for pumping out of the contents. The lockable cover can quickly be resealed and locked in place for safety.
